Native Women
Red Cross Overprints

During 1914-17, three values of the current definitives were overprinted with an additional 5 centimes to raise funds for the Red Cross. The two-line overprint was prepared locally in Hanoi while the one line overprints were printed in Paris.

PARTIAL “c”

PRINTING MIS-REGISTRATION OF ORIGINAL STAMPS
The Red Cross Overprints were prepared from the 1916 and 1917 printings of the Native Women stamps, which can be identified by the “millesime.” The millesime is the single digit for the year of printing placed in the second row between the two panes of 25 stamps each. For instance, the numeral “6” printed in the center selvedge signifies “1916.”

Red Cross Overprints
Millesimes

In addition to the two millesimes, “6” and “7,” one printing of the 10 centimes + 5 centimes denomination lacked any millesime in the selvedge.

Usage

All four types of the Red Cross Overprints frank this internal Laotian cover. These were Indochina’s first four semi-postal stamps.
Native Women
Red Cross Overprints
Earliest Use of Two-Line 10 + 5 centimes

The reported first day of public sale for the two-line overprint was 14 November 1914. Availability of the stamps to government users was evidently earlier as demonstrated by this official mailing to Hong Kong on 28 October 1914, the earliest, known use of Indochina’s first semi-postal stamp.

Use of One-Line 10 + 5 centimes

Four examples of the one-line 10 + 5 cent semi-postal stamp were used for a registered letter posted from Hanoi to Paris in 1915. Because too much postage had been affixed, a postal clerk wrote at the left "Affranchi par l'expediteur" (franked by sender) to avoid complaints to the post office.
Native Women
Red Cross Overprints
Use of One-Line 10 + 5 centimes

Postage for a local registered letter was paid with five copies of the 10 + 5 centimes Native Women semi-postal stamp. Unless the small envelope was extremely heavy, the postage was considerably overpaid.
